

CALFED
BAY-DELTA
PROGRAM

AUG 24 1999

Public Comment

Date 8/25/99

The CALFED Bay-Delta Program welcomes your participation. Please use the space below for your written comments (attach additional sheets if necessary).

Comments:

As a former convenor of the CA Urban Water Council,
I could urge the ~~California~~ Advisory Committee
Members to consider ~~the~~ ~~certification~~ & identifying
additional sources of funding for urban conservation.
The MWD ~~renewal~~ strategic plan process will
result in reduced conservation & local
resources projects such as the Dry Weather
Flow Treatment Plant currently under construction
(over)

1419(2)
at the Santa Monica Pier. This facility
will treat ^{dry weather} stormwater flows up to
500,000 gpd and the recycled water
will be used for irrigation & toilet
flushing. These types of innovative
projects are less expensive & environmentally
damaging than surface storage projects &
conveyance facilities. As the water industry
moves towards deregulation, water ~~is~~ as a
~~resource~~ ~~become~~ will become a commodity —
and thereby lose its significance as our
primary link to the natural world and
sustainable living.
